

GOVERNMENT SOLUTIONS SERVICES

Information Technology • Telecommunications • Intelligence Solutions

TekMasters is a small, growth-oriented, technology company that delivers professional services to meet mission-critical objectives through the use of highly advanced and cost effective solutions in support of the Intelligence Community, Department of Defense, Department of State, and Civilian Agencies. Headquartered in Chantilly, VA just outside of Washington DC, TekMasters is engaged in solutions and services focused around the design, development, and integration of technology services to support and enhance our clients nationwide.

INFORMATION TECHNOLOGY

TekMasters provides a full suite of Information Technology services. Leveraging the strengths of yesterday's and today's technologies with the innovations of tomorrow, we deliver applications from standalone server to web to mobile and everywhere in between. That helps our customers enhance and improve their business operations by making their services available when and where they are most needed. Our technical staff will gather requirements, design, plan, staff, and deliver custom software using proven industry methodologies and best practices. Our team has experience in all types and sizes of software development projects including:

- Applications Development
- Database Administration and Development
- Enterprise Engineering
- Information Assurance
- Information Systems Security
- Project Managers
- Systems Integration

TELECOMMUNICATIONS

TekMasters provides a full range of Infrastructure and Network services and capabilities. We offer full life cycle support from requirements, to design, capacity planning, implementation and operation. Our consultants focus on and are fully versed in all standards compliant technologies to meet your specific project requirements. TekMasters specializes in leveraging existing infrastructure and incorporating new systems to expand capacity, resiliency, capabilities, and maximize security. We have years of experience converging data and voice networks and in migrating legacy systems into modern architectures. Our team has experience in all types and sizes of telecommunications projects including:

- Cable Installation
- Circuit Activations
- Defense Messaging Services and Support
- Project Management
- Technical Control Technician (NOC)
- Network Engineer Design, Installation, and Support
- VTC Design, Installation, and Support

INTELLIGENCE SOLUTIONS

Forward thinking Intelligence solutions do far more than simply look backward and report historical data. They must have the insight and dexterity to understand past data, analyze the current market trends and also project future results. TekMasters offers a full range of services to help our customers manage and optimize their intelligence assets, making it readily available to decision makers. TekMasters has professionals well versed in the following:

- 24/7 Watch Services
- All-Source Analysis
- Counter Intelligence /Terrorism Analysis
- ELINT, HUMINT, SIGINT Analysis
- Collection Management
- Desk Officer Support
- Geographic Information Systems Development
